

TwinkleHush

Black, White & RED Garden & Sky Cards

**15 garden and sky friends, one per page:
sun, flower, cloud, apple, star,
mushroom, umbrella, cherries, moon, tulip,
kite, strawberry, tree, balloon, leaf.**

**For supervised awake time,
from about 3 months.**

Why these cards?

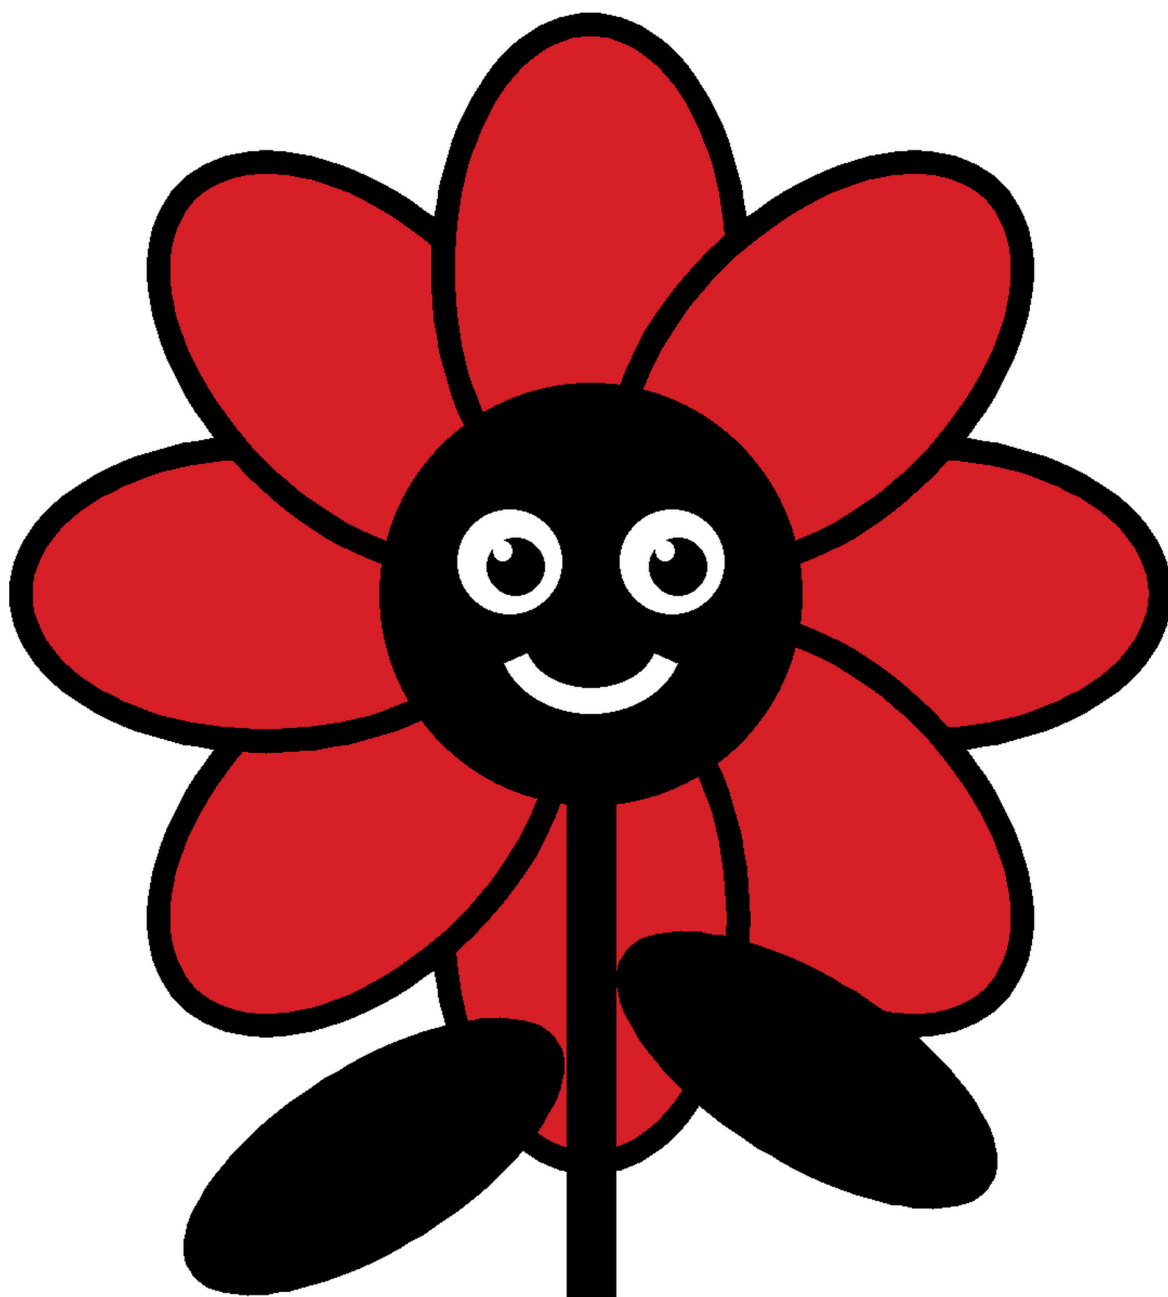

- Newborns see bold black & white best. Color vision develops around 2-3 months - and red is typically the first color babies see.
- These cards match the TwinkleHush sensory video of the same name, so what your baby sees on a card is what they saw on screen.

How to use these cards:

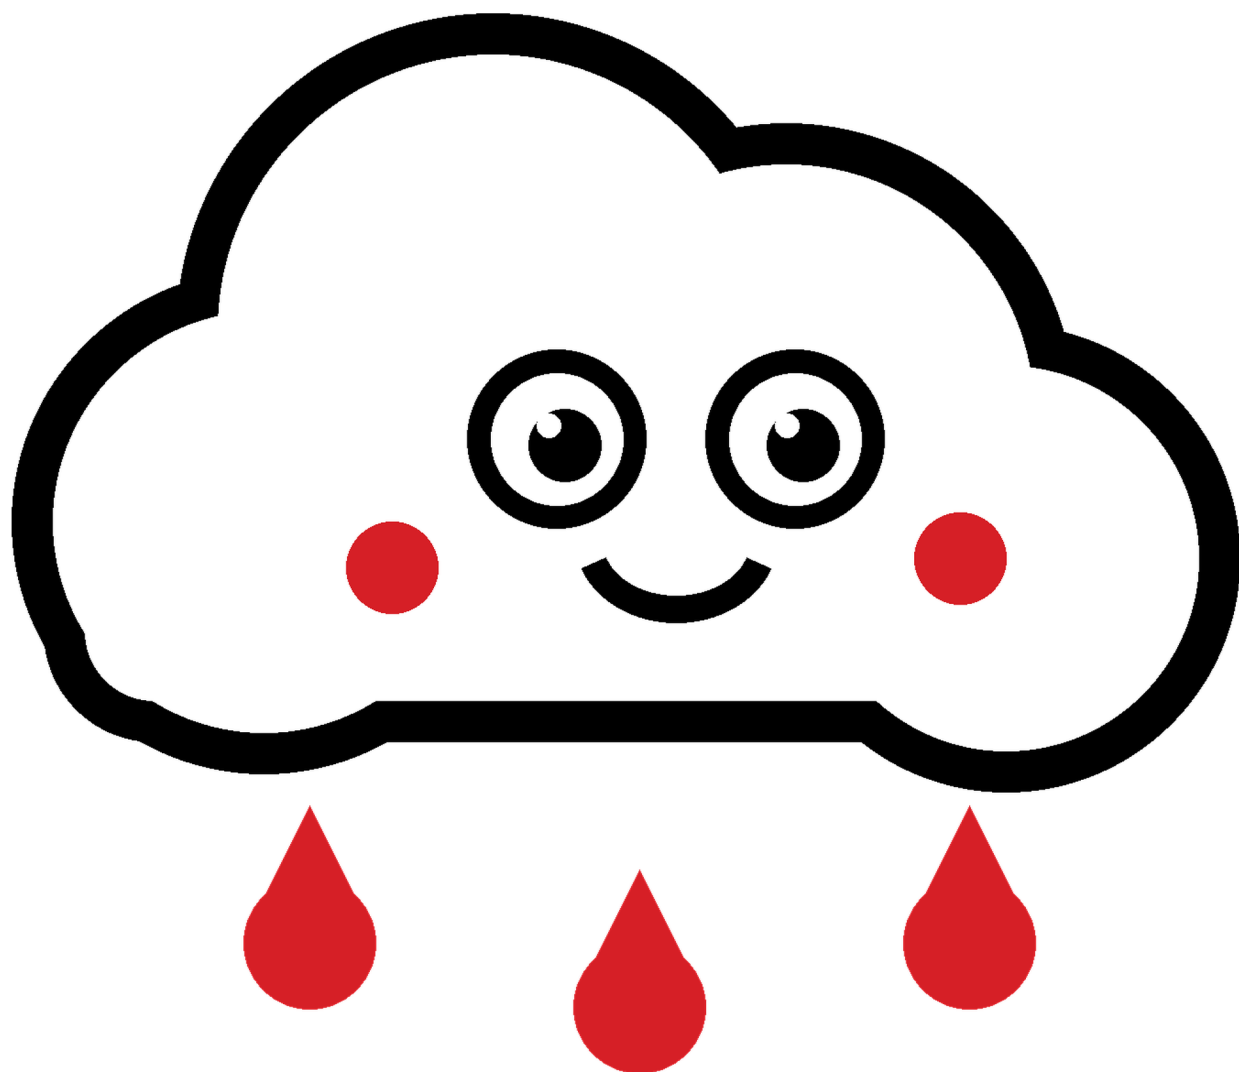

- Print on white Letter/A4 paper or card stock.
- Hold 8-12 inches (20-30 cm) away during awake time, such as tummy time.
- Say the name under each picture - your voice is part of the fun.
- Swap cards when your baby looks away.
- A few minutes at a time is plenty. Always supervised, never during sleep.
